# Angels & Demons

Murder, mystery and intrigue return as Tom Hanks reprises his role as symbologist Robert Langdon in the prequel that sparked Dan Brown's best-selling book *The Da Vinci Code*.

Hanks, Zurer and McGregor uncover a ticking time bomb.

**F**IRST of all, let's dispense with the big question. Yes, he got a haircut! Despite the massive success of Dan Brown's novel *The Da Vinci Code*, much of the chatter about the film had to do with Tom Hanks' hair—a sort-of nod to John Travolta's *Pulp Fiction* 'do.

But this time, (a smartly coifed) Hanks returns to his gig as symbolologist Robert Langdon, asked by the Vatican to investigate a murder in which the victim is brutally branded by a secret 400-year-old society known as the Illuminati, the sworn enemy of the Catholic Church. Meanwhile, the Vatican is buzzing with the prospect of choosing a new pope, but other forces are conspiring—not only to destroy famous and sacred landmarks, but also to deal a permanent deathblow to the Church.

Although Brown's novel *Angels & Demons* is a prequel to *The Da Vinci Code*, director Ron Howard and producer Brian Grazer decided the movie would play as a sequel. They have also taken a few liberties, which they say will help the plot move a little faster.

But filming at historic Rome landmarks was nearly impossible. "This movie was, strangely, harder to shoot than *The Da Vinci Code*," producer Grazer recently told *USA Today*, "even though there's less controversy." The Church was less than impressed by the gruesome murders in the story, so the filmmakers were banned from almost all of the churches and Vatican locations; instead, spectacular replicas were constructed in L.A. However, Ron Howard has admitted that some genuine footage *was* shot in Rome. "We didn't shoot at the Vatican...officially. But cameras can be made really small," Howard said.

The filmmakers were also crafty enough to film under the pseudonym "Obelisk," just to get them past a few doors that might otherwise have been closed to them. Of course, many people weren't fooled by the name change once they saw Hanks, Howard and Grazer roaming the streets of Rome trailed by camera crews.

"This is the hardest movie Ron (Howard) has ever shot," Grazer said. "Not only because of being exiled from the Vatican, but because of its darker subject matter."

Joining Hanks is Ewan McGregor as a leading cardinal who may or may not have the best interests of the church at heart, German actor Armin Mueller-Stahl, and acclaimed Israeli actress Ayelet Zurer, as a brilliant and beautiful scientist who deals in particle physics and anti-matter. It's a classic science vs. religion showdown that culminates in a spectacular apocalyptic climax.

To many readers, *Angels & Demons* was Dan Brown's best work, surpassing even *The Da Vinci Code*. Like *The Da Vinci Code*, *Angels & Demons* has sparked an interest in the landmarks that appear in the book, culminating in a tourism trade that is based on the sites in its pages. What could that mean in terms of visitors? The Rosslyn Chapel, featured prominently in *The Da Vinci Code*, now draws about 100,000 additional visitors per year.

As for his role in *Angels & Demons*, Tom Hanks recently joked with *Entertainment Tonight* about the upside of playing a guy like Robert Langdon. "Quite frankly, it's really great. It makes me seem smart...he would win *Jeopardy* every time."

—Tom Jokic

# X-MEN ORIGINS: WOLVERINE

*Hugh Jackman returns as Wolverine—the fierce fighting machine with healing powers, retractable claws and a primal fury that is a force to be reckoned with.*

**C**ALLING all fanboys. Ever wonder how Hugh Jackman's super alter ego came to be?

While Wolverine's origins have been shrouded in mystery, fans of the series and Marvel comic will finally get the answer they've been waiting for when *X-Men Origins: Wolverine* hits the big screen. But that's not all: if hairy chests, steel claws and serious samurai-style fighting strike your fancy, just wait until you see Wolverine fight against his mutant nemesis Sabretooth, played by Liev Schreiber, and Deadpool, played by Canadian star Ryan Reynolds, in the prequel film that reveals how Wolverine came to be the fierce

mutant that he is.

The film explores the early life of Logan/Wolverine's epically violent and romantic past, his complex relationship with Victor Creed (Sabretooth), and the ominous Weapon X program. Along the way, Wolverine encounters many mutants both familiar and new, including surprise appearances by several legends of the X-Men universe whose appearances in the film series have long been anticipated. Who? You'll have to wait and see.

What will be familiar though is Wolverine's complex nature. Through the last *X-Men* trilogy, we've seen Wolverine's strengths and the pain and angst that came along with being

a mutant. But this time, Jackman says Wolverine will be much deeper and darker.

"We are dealing with a character who is probably one of the darker comic book characters ever created," Jackman said of Wolverine to [Firstshowing.net](http://Firstshowing.net). "The movie has a lot of fun elements, but there are layers of pain and darkness to this character. I really wanted to do this spin-off movie because I felt we hadn't truly found who this character was." Added producer Lauren Shuler Donner to [Comingsoon.net](http://Comingsoon.net): "You haven't seen this side of him. It's darker and sadder. But there's a ton of action. It's really kick-ass."

See how it all began as a new crew embarks on an exciting adventure aboard the USS Enterprise, traveling where no man has gone before.

**W**ITH a new film on the horizon, and a fresh new cast, fans will get to see how it all started: how James Kirk became captain of the USS Enterprise, the war with the Romulans, and most importantly how the famous line “Beam me up Scotty” got its start.

At a recent sneak peek at exclusive footage from the film in Toronto, presented by the film’s director, J.J. Abrams, fans can expect to see massive explosions, cool action sequences, and most of all, some dynamic character interaction.

*Tribute’s* Bonnie Laufer-Krebs recently got the scoop from Zachary Quinto about the film, the cast and what it was like to get in full-on Spock costume mode, ears and all.

**When you found out you got the role of Spock, were you nervous?**

**Quinto:** I wasn’t really nervous because I was so surrounded by people that I trusted. It put me in a position to connect with these amazing minds and the creative energy of these people, to trust that they would take me where I needed to go, Leonard (Nimoy) included. So it didn’t really engender in me a sense of anxiety about it so much as it did excitement.

**You’re playing Spock at a younger age, which is so cool. What was the feeling you got from fans at Comic-Con?**

**Quinto:** I’ve been met with tremendous enthusiasm especially now that more and more images from the movie are being shared. There’s a real momentum and real excitement that I’ve experienced. So that’s encouraging.

**Your resemblance to an early Spock played by Leonard Nimoy is just amazing!**

**Quinto:** It’s pretty remarkable and I’ve been so blessed to get to know him. There are aspects to him as a person that really resonate for me, and he’s been a real inspiration.

**Do you remember the first thing Nimoy told you when you found out you were going to play Spock?**

**Quinto:** Well, we met in an elevator at Comic-Con and he said, “You have no idea what you’re in for, kid!”

**Do you recall what it was like when you put the Vulcan ears on for the first time?**

**Quinto:** The first time I put the ears on it was a make-up test so they were working with the material, making sure

they were durable enough and appropriately shaped for my face and head. It was a moment of clarity that this wasn’t theoretical anymore, that this was actually something that was happening.

**It must have felt gratifying when you were in full Spock costume.**

**Quinto:** Yeah, definitely. There was this sort of physical transformation that took place over time, before we started shooting, when I had to shave my eyebrows and that really, for me, sort of drew it all together and put me in a physical space to really be available to the character.

**You also worked with an amazing ensemble! What was it like working with Chris Pine, Simon Pegg and John Cho?**

**Quinto:** There’s not a weak link in the bunch and everybody has such a great sense of humor. For the most part, we’re all going through something for the first time together and that’s really nice. The core of us are really sort of being connected through what this means to us and to our lives, which is a really nice thing to be able to share.

*Star Trek* also stars Ben Cross, Bruce Greenwood, Winona Ryder, Zoe Saldana, Anton Yelchin and Eric Bana.

## Monster vs. Aliens

March 27 Family

**Voices:** Reese Witherspoon, Kiefer Sutherland, Seth Rogen, Will Arnett, Hugh Laurie, Stephen Colbert, Paul Rudd

When the evil Gallaxhar plans to take over Earth, the president (voiced by Stephen Colbert), along with General Monger (Kiefer Sutherland), have no choice but to enlist the help of secret government monsters, including Ginormica (Reese Witherspoon), B.O.B (Seth Rogen), The Missing Link (Will Arnett), and Dr. Cockroach Ph.D. (Hugh Laurie) to help save the planet. Sutherland, Wilson and Rogan recently talked to *Tribute's* Toni-Marie Ippolito about what it was like to get into the minds of their animated characters.

**Cast:** Justin Chatwin, Emmy Rossum, James Marsters, Yun-Fat Chow

When the alien Goku (Chatwin) is sent on a mission to destroy Earth, he crash-lands on the planet and loses all memory of who he is and what he was set out to do.

Taken in by an old martial arts expert who becomes his adoptive grandfather, Goku embraces life on earth and sets out on a mission to save the human race against the evil Lord Piccolo (Marsters), who plans to take over the world by collecting the seven mystical Dragonballs, which have the power to summon dragons to grant any wish.

With only one Dragonball in his possession, Goku enlists the help of a young girl, Bulma (Rossum), and Master Roshi (Chow) to help him on his dangerous quest. —Tom Sanderson

It's nice to see you doing comedy! Would you tell us a little bit about General Monger and if there was any inspiration behind the voice?

**Kiefer Sutherland:** He really cares about these monsters, even though he pretends not to. I thought the story was unbelievably funny but I also found it really touching. You know, I have to say that the voice is kind of riding the coattails of Yosemite Sam and it wasn't on purpose. For whatever reason, I just thought this guy should have a hint of Southern flair.

How do you get into the mindset of an evil creature like Gallaxhar?

**Rainn Wilson:** I think we all have an evil side and I think it's pretty easy to access. And I definitely have a pretty big ego, and I'm able to tap into that. And I'm actually part alien (laughs).

Will, can you give us a bit of insight into your character? He appears to be a little bit out of shape!

**Will Arnett:** Well, it's been awhile since he's been in shape. But he may be a little bit misguided in that department. And he really doesn't want to be bogged down by a bunch of serious matters. He just wants to get back to Coco Beach and start scaring some folks. This is a guy who lives in a swamp who is much more of a follower than a leader, although he sees himself as a leader. He's almost like an even dumber Han Solo!

Seth, when you first saw the drawing that you were going to play a big gelatinous blob, what was your reaction?

**Seth Rogen:** I thought it was really funny, you know what I mean? I was excited. I mean it just seemed technically like a real achievement. The whole like translucent, you know, texture of the character I thought was very neat. The way they talked about animating it was really cool. And the 3-D really works really well, so I was thrilled when I saw it.

## HAYDEN CHRISTENSEN - ARIES, BORN APRIL 19, 1981, VANCOUVER

Are they or aren't they? It was hard to pin down the marriage plans of this Vancouver-born heartthrob to fiancée Rachel Bilson. With a Moon in Scorpio, Christensen prefers to keep his private life under wraps. And though slow to commit, he is ferociously devoted to those he cares about. Born on the cusp of Aries and Taurus, the former gives him the swashbuckling panache to take on adventure roles such as the two *Star Wars* films. The Taurus side means that he will be able stay on "sexiest" lists, even as he matures. His ambitions are about to go into orbit, perhaps because he feels more secure with Bilson. You can expect to see him in more starring roles on the big screen, and soon!

# Star Struck

*What the stars have planned for you*

## **ARIES** (MAR 21 - APR 20)

April 1st—but you're no fool. You have a keen eye for a fresh opportunity. More than one chance for a new start comes your way, especially around the 22nd. Meanwhile, a romantic co-star demands a retake late in the month, setting the scene for make-or-break scenarios.

## **TAURUS** (APR 21 - MAY 21)

Your life scenario gets off the storyboard and into production. With both your work and love lives in the plot, it's a lively cycle. People around you find your inspirations especially divine around mid-month. The 24th kicks off a cycle where you feel more in control.

## **GEMINI** (MAY 22 - JUNE 21)

Have you been miscast? Even though you feel a little out of sync say yes to all social invitations. Expand your outlook and learn new ways of doing things. A chance meeting around the 24th could bring you face-to-face with someone with romantic lead potential. Do follow up if you're eligible.

## **CANCER** (JUNE 22 - JULY 22)

You're dreamy and giddy with spring, which could be due to that new love interest in your life. On the career front, your starry-eyed dreams get a boost from taking a creative approach to realizing them. If the wanderlust is triggered, it's best to wait until after the 24th to head through the international departure gates.

## **LEO** (JULY 23 - AUG. 23)

Your finances grab the spotlight most of the month. Earning power is amplified, but the effect will be diminished if you blow it on flashy new toys. If casting a new co-star, improvised lines work best mid-month, when your wit at the keyboard will dazzle.

## **VIRGO** (AUG. 24 - SEPT. 23)

A new perk at work or a nice tax refund? You'll never know unless you ask! There's no time like the present to claim what's yours. Who knows, you may strike a new deal or two. Late in the month it's the state of your union that claims your attention. Your charm works wonders in negotiations.

## **LIBRA** (SEPT. 24 - OCT. 23)

Gather ye daffodils during a lighthearted trend. You'll see progress at last in a key relationship, or a new romance may bloom by mid-month. At the very least you really should treat yourself to a spa treatment. From the 24th on risky investments, however tempting, only prove a case of frying pan into the fire.

## **SCORPIO** (OCT. 24 - NOV. 22)

A nose-to-the-grindstone approach works best if you don't want to appear like a fool. A harmless flirtation around the water cooler could backfire, so resist. By mid-month a more balanced trend prevails. Take time for some fun in both love and life, and expect a happy surprise or two.

## **SAGITTARIUS** (NOV. 23 - DEC. 21)

Spring fever strikes, luring your thoughts far, far away. Follow that urge through the departure gates, since both travel and new friendships are especially favoured. After the 24th, a higher-prestige position could be yours if you're willing to take on the extra responsibilities.

## **CAPRICORN** (DEC. 22 - JAN. 20)

Home is where your heart is most of this month, so why not settle in for a while? Things are warm and cozy with your significant other. A renovation project, however, is best finalized after the 24th. That's when all things having to do with romance and recreation prosper.

## **AQUARIUS** (JAN. 21 - FEB. 18)

You may as well install a revolving door. Friends and colleagues use your pad as a second home, which has you going in circles. At least your impromptu parties earn stellar reviews. Schedule some solo downtime around the 24th, when you can fine-tune the financial picture and may get a boost in earnings.

## **PISCES** (FEB. 19 - MAR. 20)

The month kicks off on a positive note, with ample opportunities to socialize. Your eagle eye could help you make extra cash, perhaps through lucky finds at a garage or estate sale. Don't be surprised if a few old friends or flames go out of the way to get in touch.

## They're Back!

*Christian Bale may be an A-list, superhero Hollywood actor, but there's one bloke who stands to steal some of his spotlight in the upcoming Terminator Salvation: Sam Worthington.*

Is he a cyborg or human? Even rising star Sam Worthington's character doesn't know his exact identity in the upcoming, and much-anticipated, *Terminator Salvation* movie. And although many don't know yet who Sam Worthington is either, he's about to become a huge star.

"I'm the one who doesn't know what he is," Worthington said during Comic-Con. "He's trying to figure out if he's human or machine, and it's a journey about identity."

Born in Perth, Australia, on August 2, 1976, Worthington is getting his first taste of what it's like to not only be a part of a huge blockbuster action film, but to be part of a huge franchise that has a devoted following. "Our mission is to show fans that we're true to the

mythology, and we want to make the war movie that everyone's been waiting for," Worthington said.

In the shot above, you see Worthington as Marcus Wright during a confrontation with Christian Bale's John Connor. From an exclusive Toronto sneak peek of the film with director McG, we know that Wright's last memory was getting a prison death sentence. But years later, with the murderous machines of SkyNet wiping out the human race, Wright awakens, alive but unsure how he got where he is or even who or what he is. But more importantly, can John Connor trust him?
